

CONSUMER GUIDE TO ELECTRIC VEHICLES

AUGUST 2022

WHY BUY AN ELECTRIC CAR?

Electric vehicles (EVs) are fun to drive, safe, comfortable, and convenient to refuel.

They also cost less to operate per mile and produce no tailpipe emissions.

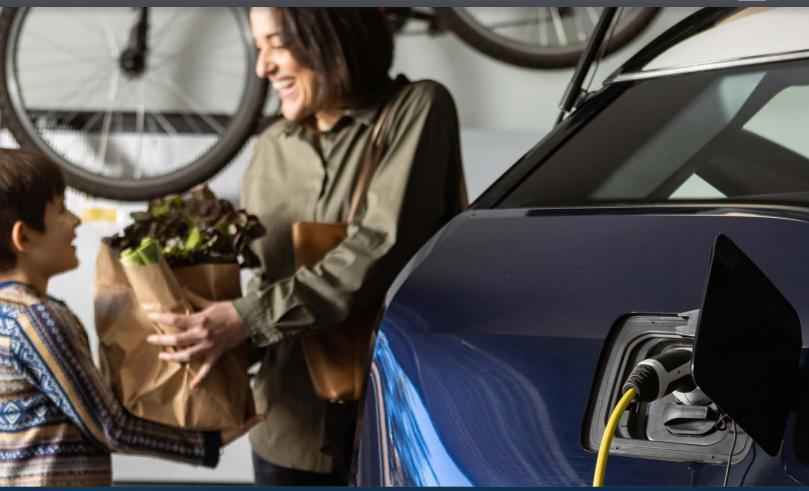

Today's electric cars do everything a gas car can do—and more. Most are high-performing vehicles with silent, instant torque, superb handling, and the latest technology and safety features. Most can travel 200–250 miles on a charge; many can go farther.

Although most EV drivers prefer to charge at home for its convenience and savings, a growing national network of public charging sites enables more consumers—even those who can't plug in at home—to consider purchasing an EV.

Because EVs are powered by electricity instead of gasoline, they shift our energy reliance to domestic sources while also reducing emissions. Cutting vehicle emissions is especially critical in communities adjacent to heavily trafficked roadways. As local power generation grows cleaner, every electric car charged on that grid gets cleaner too—and the broader public health and climate benefits grow. Electrifying light-duty transport would reduce overall greenhouse gas emissions by 17% relative to 2018 levels, according to U.S. EPA.

EV 101

This guide highlights the two types of EVs that plug into the grid to recharge their batteries. They are battery-electric (or all-electric) vehicles and plug-in hybrids (or PHEVs).

All-electric vehicles are powered solely by an electric motor and battery. They burn no gasoline or diesel fuel, so they have no tailpipe and no emissions. Battery technology is rapidly advancing, vehicle costs are declining, and range between charges is increasing.

Plug-in hybrids pair an electric motor and battery with an internal-combustion engine. Plug-in hybrids drive on electricity until the battery is mostly empty. Then the engine turns on, and the car drives like a conventional hybrid.

Conventional hybrids, sometimes called "electrified vehicles," refuel only with gasoline. Because they do not plug in, they are not included in this guide.

- Battery-electric cars available as of August 2022; discontinued models or older model years may still be available, and some 2023 model years are already available.
- Range sources: www.fueleconomy.gov and automaker specifications.
- Range per hour of charging assumes home or workplace Level 2 (240V) charging.
- Fast-charging times are provided by automakers or calculated from automaker statements. These rates vary due to many factors, including battery charge level and ambient temperature.
- Starting manufacturer suggested retail price (MSRP) is retrieved from automaker websites and may vary.
- Models that offer different configurations and battery sizes may show multiple numbers for driving range, charging time, and starting MSRP.
- Vehicles are available nationwide unless designated "Select Markets" in their individual listing.
- · Despite industry classifications of five-door vehicles as crossovers or compact SUVs, this guide categorizes them as hatchbacks unless they are offered with all-wheel drive.

SUV/CROSSOVER

2022 Audi e-tron

™ Battery-electric SUV/Crossover

EPA electric range: 204 and 212 miles Range/hour of charging: 21 miles

Fast charging: 153–160 miles in 22 minutes **Starting MSRP:** \$150,900-\$154,850

- Plug-in hybrid cars available as of August 2022; discontinued models or older model years may still be available.
- Range sources: www.fueleconomy.gov and automaker specifications.
- Range per hour of charging assumes home or workplace Level 2 (240V) charging.
- Starting MSRP is retrieved from automaker websites and may vary.
- Vehicles are available nationwide unless designated "Select Markets" in their individual listing.
- Despite industry classifications of five-door vehicles as crossovers or compact SUVs, this guide categorizes them as hatchbacks unless they are offered with all-wheel drive.
